

RouteViews API etc

I've started collecting various bits and pieces about RouteViews, a project I've been helping NSRC with since mid-2022.

API

The API is RouteViews preferred way for network operators and researchers to access the BGP data.

Here are the ways of accessing and using the API.

Prefix Query

The command is <https://api.routeviews.org/prefix/112.198.234.0/24>
