

# RouteViews API etc

I've started collecting various bits and pieces about RouteViews, a project I've been helping NSRC with since mid-2022.

## API

The API is RouteViews preferred way for network operators and researchers to access the BGP data.

Here are the ways of accessing and using the API.

## Prefix Query

The command is <https://api.routeviews.org/prefix/112.198.234.0/24>
