PFS Internet Development

Service update: Apologies for the non-availability of this site from the 8th April to 19th May 2020. My hosting company, Vodien, broke IPv6 access when migrating me from Quadra (whom they took over). Took them 6 weeks to resolve the issue. Thankfully IPv6 access is now restored.

BGP (Border Gateway Protocol) is the routing protocol of the Internet. Without it, we'd have no Internet, at least not as we know it today.

PFS Internet Development is a consultancy involved in the ongoing development of Internet infrastructure around the world. The company's owner, Philip Smith, has been involved in the Internet industry since the late 1980s, in roles ranging from commercial ISPs, to working in development activities for a major Internet equipment vendor, to working for not-for-profit organisations.
