# IPv4 and IPv6 Routing Workshop

- **Date:** 6th to 10th September 2018
- **Venue:** OPT Centre, Nouméa, New Caledonia

## Workshop Goals

This five-day IPv4 and IPv6 Routing Workshop, teaches network operators about routing using IPv4 and IPv6, and how to deploy IPv6 on their network infrastructure.

## Target Audience

Technical staff who involved in Internet technology standards, local and national network infrastructure deployment, and day to day network operations.

## Pre-requisites

It is assumed that the workshop participants know how to use a router command line interface, do basic router configuration and have a working knowledge of an IGP (OSPF or IS-IS) and BGP fundamentals. Knowledge of the IPv6 protocol is helpful but not essential.

**This workshop is not an introduction.** The lab exercises use Cisco IOS configuration syntax.

**Participants are required to bring their own laptops.** These can be Windows/Linux/macOS and must have working wireless to allow participation in the hands on lab exercises.

## Class Size

The workshop can accommodate up to 30 participants
