Introduction to Routing Workshop

Workshop Goals

This five-day Introduction to Routing Workshop is a technical workshop, made up of lecture and hands-on lab work to teach the IPv4 & IPv6 Routing skills required for the configuration and operation of large scale networks that make up the Internet.

Target Audience

Technical staff who are now building or operating a wide area service provider network with international and/or multi-provider connectivity, or considering participation at an Internet Exchange point, or considering deploying IPv6 across their infrastructure and to their end users.

Workshop Items

- Agenda (includes links to presentations and schedule)
- Detailed Description
- Instructors: Philip Smith, Md Zobair Khan
